**The University of Hong Kong**, Hongkong, China Oct. 2019 - Mar. 2020  
Research Assistant, *Supervised by Prof. Ping Luo*

- **One-stage Instance Segmentation.** Proposed an anchor-box free and single shot instance segmentation method, termed PolarMask, which formulates the instance segmentation problem as instance center classification and dense distance regression in a polar coordinate. This work *PolarMask: Single Shot Instance Segmentation with Polar Representation* is accepted by CVPR 2020, and the extension version is accepted by TPAMI 2021.

**SenseTime**, Beijing, China Aug. 2019 - Mar. 2020  
Research Intern, *Supervised by Xuebo Liu and Ding Liang*

- **Optical Character Recognition.** Did research on text detection and recognition in natural scenes, and tried to 1) solve the ambiguity in text detection and 2) design a real-time algorithm for arbitrary-shaped text detection and recognition. The first work is accepted by ECCV 2020, and the second work is accepted by TPAMI 2021.

**Momenta**, Beijing, China Jun. 2018 - Dec. 2018  
Research Intern, *Supervised by Dr. Xiang Li*

- **Deep Neural Networks Exploration.** Did research on the receptive fields of CNNs, and designed a dynamic selection mechanism in CNNs that allows each neuron to adaptively adjust its receptive field. This work *Selective Kernel Networks* is accepted by CVPR 2019.
- **Object Detection.** Led a team to take part in Autonomous Driving Perception Task in AI Challenger 2018. Re-implemented and improved Cascade R-CNN to detect objections in autonomous driving scenarios. Our team finally secured the 2<sup>nd</sup> place in the task.
